**EXCELLENT MINE RECLAMATION**

**ROCK CREEK MINE, NOME MINING DISTRICT**

Reclamation 2016

Walsh and Main Pits Reclamation 2016

2012

2012

Alaska Gold Company, LLC (AGC) first developed the Rock Creek Mine within the Nome Mining District in 2006. In November 2012, AGC was purchased by Bering Straits Native Corporation (BSNC). Under BSNC's ownership, the final reclamation of the Rock Creek Mine was completed by AGC during the summer of 2016.

AGC's dedication of commitment to reclaiming the Rock Creek Mine is made evident through their exceptional efforts to recontour, armor and seed disturbed areas to blend with the surrounding natural landscape and promote wildlife habitat. AGC's efforts have proven successful in continuing to display stability and the growth of established native vegetation, a testament by which the Musk Oxen have approved.

The State of Alaska thanks Alaska Gold Company, LLC and Bering Straits Native Corporation for their excellence in responsible stewardship and for exceeding reclamation standards required by the State of Alaska. We congratulate Alaska Gold Company, LLC as most deserving recipients of this award.
